Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 1-21 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3, 5-12, and 14-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Watterson et al. (US6498800).

With respect to claims 1, 5-10, and 14-21, Watterson show in Fig.3-4 a laser system for transmitting the beam in a WDM communication system (col.5, 1.43-44) comprising a laser 105 for generating a laser beam, a beam splitter 125, a control filter 130 (etalon) in a control path and a reference filter 160 (etalon) that has the periodicity greater than the periodicity of the control filter (see col.4-6) in a reference path, and an optical waveguide for transmitting the laser beam.

With respect to claims 2-3 and 11-12, Watterson disclose in Fig.3 a controller 115.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Watterson et al. (US6498800) in view of Rakuljic et al. (US5691989).

With respect to claims 4 and 13, Watterson disclose all limitations of the claims except for a servo system. Rakuljic disclose a servo system (col.13, 1.15-16). For the benefit of controlling the laser, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide Watterson a servo system as taught by Rakuljic.
